**Country Targets Supported by Pink Ribbon Red Ribbon**

- Launch HPV vaccination demonstration program in 2015, and achieve at least 80 percent coverage (11,547) of girls within the target population.
- Draft and publish National Cancer Control Plan.
- Open 36 “See-and-Treat” sites.
- Reach at least 80-percent coverage of screening and treatment for pre-invasive cervical-cancer cases within the appropriate target populations:
  - 22,982 women around Woliso;
  - 79,315 women in Sidama Zone

---

2015 PRRR Targets

1. Officially launch PRRR in Ethiopia.
2. Secure funding from GlaxoSmithKline (GSK).
3. Finalize two-year work plan with budget, funding sources and timeline.
4. Complete the vetting process for potential in-country implementing partners.
5. Finalize sub-agreements with implementing partners.
6. Procure equipment for 36 sites.
7. Train and equip health workers to provide “See-and-Treat” services at the two referral hub hospitals.
8. Train Health Extension Workers around PRRR-supported sites in Oromia and SNNPR.

Contributions from PRRR Partners

- **GlaxoSmithKline (GSK):** US$ 2 million over three years to support HPV vaccination, assist the Federal Ministry of Health (FMoH) to draft and publish a National Cancer Control Plan; and expand access to the screening for, and treatment of, cervical pre-cancer.

- **Bristol-Myers Squibb Foundation:** US$1.2 million for community-based cervical-cancer programming; US$ 200,000 already released for planning and capacity-building.

- **The U.S. President’s Emergency Plan for AIDS Relief (PEPFAR):** US$ 1 million to advance efforts to screen for and treat cervical pre-cancer by building on the PEPFAR-supported HIV/AIDS service-delivery platform.

- **American Cancer Society (ACS):** US$40,000 extension of the “Meet the Targets” grant to the Mathiwos Wondu Ye-Ethiopia Cancer Society, to support cancer planning and advocacy activities; US$40,000 to train local Ethiopian organizations in awareness-raising, community-mobilization and messaging for HPV vaccination.

- **International Atomic Energy Agency (IAEA):** Will support the Ethiopian Government to consolidate existing radiotherapy and nuclear medicine services at Black Lion Hospital in Addis Ababa, and establish new centers for the diagnosis and treatment of cancer patients at university teaching hospitals in Gondar, Awassa, Jimma, Meke’le, and Haromaya. The estimated cost of support for the next two years is US$ 2,264,000.

- **General Electric (GE):** US$ 500,000 (*in-kind*) to provide advisory support and technical assistance to the Ethio-American Doctors Group in the planning, design, and development of a cancer center; and help train and equip Ethiopian biomedical technicians in the public sector in partnership with the FMoH to improve the quality of cancer diagnostics.

- **Cordaid Global Leaders:** US$ 600,000 over two years to support screen-and-treat sites for cervical pre-cancer in SNNPR and Addis Ababa.

- **Grounds for Health:** US $200,000 to improve the coverage of screening and preventive therapy for cervical pre-cancer in coffee cooperatives in the Sidama zone of SNNPR.
